

# Charlesson Mendes Pereira

## Junior Frontend Developer

(+55) 77 99115-3244 · charlessonmendes@gmail.com · [linkedin.com/in/charlesson-mendes-developer](https://www.linkedin.com/in/charlesson-mendes-developer) · [charlesson-portfolio.vercel.app](https://charlesson-portfolio.vercel.app)

### SUMMARY

Frontend Developer with hands-on experience building real-world projects using **Next.js**, **React**, **Vue.js**, **TypeScript** and **Tailwind CSS**. Focused on responsive interfaces, performance optimization and technical SEO. Background in IT support and graphic design provides a strong foundation for collaborating with Backend and Design teams. Comfortable with Git/GitHub version control and deployment via Vercel.

### TECHNICAL SKILLS

|                   |                                                                                                        |
|-------------------|--------------------------------------------------------------------------------------------------------|
| Frontend          | HTML5 · CSS3 (Flexbox & Grid) · JavaScript ES6+ · TypeScript · React · Next.js · Vue.js · Tailwind CSS |
| Performance / SEO | Lazy Loading · Asset Optimization · Core Web Vitals · Lighthouse · PageSpeed · Technical SEO           |
| Tools             | Git & GitHub · Vite · Vercel · VS Code                                                                 |
| Languages         | Portuguese (native) · English (intermediate — proficient technical reading & writing)                  |

### PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Mile Artesanatos</b><br>Freelance · Next.js · TypeScript · Tailwind CSS · App Router · Server-Side Logic<br>■ <a href="https://mile-artesanatos.vercel.app">mile-artesanatos.vercel.app</a>   <a href="https://github.com/Charlesson-MP/mile-artesanatos">github.com/Charlesson-MP/mile-artesanatos</a> <ul style="list-style-type: none"><li>Built a digital storefront for a real handcraft business, prioritizing clear product presentation and intuitive browsing experience.</li><li>Implemented a server-side validation layer using Next.js App Router to centralize business logic on the server, preventing client-side manipulation via DevTools and protecting against fraud.</li><li>Fully responsive layout with Tailwind CSS, optimized for mobile, tablet and desktop.</li></ul> | 2024 – 2025 |
| <b>Mortugaba Tech</b><br>Team project · Next.js · TypeScript · Tailwind CSS · Git/GitHub · Vercel<br>■ <a href="https://mortugaba-tech.vercel.app">mortugaba-tech.vercel.app</a>   <a href="https://github.com/Charlesson-MP/mortugaba-tech">github.com/Charlesson-MP/mortugaba-tech</a> <ul style="list-style-type: none"><li>Built the frontend as part of a team using Next.js (App Router), managing tasks via Git and conducting code reviews on GitHub.</li><li>Implemented responsive layouts with Tailwind CSS, ensuring visual consistency across all screen sizes and breakpoints.</li><li>Collaborated closely with team members to align design decisions with functional requirements throughout the development cycle.</li></ul>                                                      | 2024        |
| <b>Los Burgers</b><br>Freelance · Vue.js · Vite · Tailwind CSS · SEO · Core Web Vitals<br>■ <a href="https://los-burgers.vercel.app">los-burgers.vercel.app</a>   <a href="https://github.com/Charlesson-MP/los-burgers">github.com/Charlesson-MP/los-burgers</a> <ul style="list-style-type: none"><li>Developed an e-commerce delivery app for a burger restaurant, focusing on fast load times, conversion and smooth user experience.</li><li>Applied lazy loading and asset optimization techniques, achieving high scores on Google Lighthouse and PageSpeed Insights.</li><li>Implemented full technical SEO: semantic markup, heading hierarchy, meta tags and crawl-friendly structure.</li></ul>                                                                                          | 2024        |

## Wiki Movies

2023

Personal project · JavaScript ES6+ · Fetch API · HTML5 Semantic · CSS3

■ [charlesson-mp.github.io/wiki-movies](https://charlesson-mp.github.io/wiki-movies) | [github.com/Charlesson-MP/wiki-movies](https://github.com/Charlesson-MP/wiki-movies)

- Developed a SPA in vanilla JavaScript consuming a REST API via Fetch, with error handling, loading states and dynamic content rendering.
- Implemented real-time search with efficient DOM manipulation, delivering instant feedback without page reloads.
- Structured with semantic HTML5 and fully responsive layout using CSS3 Grid and Flexbox.

## WORK EXPERIENCE

---

### Frontend Developer

2024 – Present

Freelancer

- Development of modern, responsive, performance-driven web interfaces using React, Next.js, Vue.js, TypeScript and Tailwind CSS.
- Built landing pages, e-commerce platforms and API-integrated applications, applying best practices in component architecture and code organization.
- Version control with Git/GitHub on individual and collaborative projects; continuous deployment via Vercel.

### IT Technician

May 2022 – Jan 2024

City Hall of Vitória da Conquista – BA, Brazil

- Provided remote and on-site technical support across multiple municipal departments, focusing on issue resolution and system operational stability.
- Installed, configured and maintained software, networks and hardware; communicated clearly and effectively with non-technical end users.

### Graphic Designer

Jan 2016 – Nov 2017

Gráfica Universo

- Created visual materials with attention to brand identity, typography and composition — skills directly applicable when collaborating with Design teams.

### Network Technician

Feb 2013 – Mar 2015

Conecta

- Installed and configured networks for residential and commercial clients, ensuring stable and reliable connectivity.

## EDUCATION

---

### Bachelor's Degree in Computer Science — in progress (8th semester)

2019 – Present

Universidade Estadual do Sudoeste da Bahia (UESB), Brazil
